ELIYAHU COHEN

Senior Fullstack Engineer | TypeScript · Node.js · React · GCP

058-5669183 | eliyahutrab@gmail.com | Jerusalem / Tel Aviv & Central Israel | LinkedIn

High-Level Security Clearance (Active)

SUMMARY

Senior fullstack engineer with 6+ years of experience building production systems end to end – from database design and backend services to React/Next.js frontends, cloud infrastructure and CI/CD. Specializes in the TypeScript ecosystem (Node.js, NestJS, Express, React, Next.js) with PostgreSQL, Docker and GCP. Built nationwide, citizen-facing systems in the Cyber Division of Israel Police, including AI-powered products, while leading a 12-person team.

EXPERIENCE

Team Lead & Senior Fullstack Engineer | Cyber Division, Israel Police **2023 – Present**

- **AI-powered national complaint system** – Architected and developed a system that lets any Israeli citizen file a police complaint at stations nationwide, featuring a live AI avatar, LLM-based capabilities, GCP infrastructure and Gov.il (Memshal Zamin) government services integration.
- **Candidate screening platform** – Designed and built from scratch an external system for screening and vetting candidates applying to Israel Police.
- **Stack** – Node.js, NestJS, Express, TypeScript, React, Next.js, PostgreSQL, Python, Docker, GCP.
- **Observability & delivery** – Implemented GCP monitoring with automated alerting and CI/CD pipelines, enabling fast, safe deployment of fixes to production.
- Shipped every system to production on schedule in a dynamic, high-pressure environment.
- Lead a team of 12 engineers while coding 50–100% of the time; own architecture decisions and code reviews.
- Mentored engineers from mandatory service with onboarding guides and structured handovers for existing systems.
- Translate requirements into technical specifications and manage user testing prior to production.

Software Developer | Rami Technologies **2021 – 2023**

- Built backend microservices for an agri-tech platform detecting agricultural field conditions such as drought stress and tree health.
- Developed in a containerized microservices environment: Node.js, TypeScript, Docker, Kubernetes.
- Delivered features according to specifications, including testing and technical documentation, as part of an Agile team.

Fullstack Developer (Freelance) | Independent **2020 – 2021**

- Designed, built and maintained fullstack web systems for multiple clients, tailored to each business and to evolving requirements.
- Owned the full client relationship – requirements, delivery, bug fixes and live upgrades – working independently end to end.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, SQL, HTML, CSS/SCSS

Backend: Node.js, NestJS, Express, FastAPI, REST APIs, Socket.io, RabbitMQ, Microservices

Frontend: React, Next.js, Redux, Zustand, Tailwind CSS, shadcn/ui, MUI

Databases: PostgreSQL, MongoDB, SQLite, Firebase

Cloud & DevOps: GCP, Docker, Kubernetes, CI/CD (GitHub Actions, GitLab), Nginx, Linux, Monitoring & Alerting

AI: LLM integration (OpenAI GPT, Anthropic Claude, Google Gemini), conversational AI, AI avatars, AI coding agents (Claude Code)

Methodologies: Agile / Scrum, Jira, technical specifications, UAT, risk management

Spoken Languages: Hebrew – Native, English – High proficiency

EDUCATION

Software Engineering | Jerusalem College of Professional Training **2019 – 2022**

Full matriculation diploma (12 years of schooling)

VOLUNTEERING

Mentor, Perach Project | Computer Science & Algorithms for High-School Students **2019 – 2020**
